

ComfortGel SE

Stretcher Support Surface

ComfortGel SE assists in improving patient outcomes through pressure redistribution and enhanced comfort.¹

Helping transform the standard of stretcher support surfaces

When we developed the SE series of stretcher surfaces, we focused our design on aiding in proactive prevention.

ComfortGel SE was designed with the overall patient experience in mind and has specific features to help redistribute pressure and enhance patient comfort.

Key Features

- Aids in the treatment and prevention of pressure ulcers¹
- Gel design affords memory and durability
- Sloped heel section assists in offloading pressure from patient's heels
- Slip-resistant bottom material eliminates the need for Velcro
- Three-sided zipper enables caregivers to more thoroughly inspect the condition of internal components

CoreGel Technology

Located in the sacral region, CoreGel creates a positioning pocket to help prevent patient migration.² Its design helps absorb and disperse patient weight to aid in pressure redistribution.

Cover design

ComfortGel SE's surface cover provides increased chemical resistance; high-frequency sealed seams, and a three-sided zipper for better visibility during internal component inspections.

Welded seams

Knowing surface seams are a common problem area for infection, our covers are sealed with a specific type of RF welding utilising electromagnetic bonding to limit fluid ingress and infiltration.

Slip-resistant bottom

ComfortGel SE's bottom features a slip-resistant material to help improve infection prevention through the elimination of Velcro while maintaining affixation to the stretcher during patient movement and transfer.

ComfortGel SE

Stretcher Support Surface

Standard Features

- CoreGel Technology
- Polycarbonate polyurethane cover
- Welded seams
- Sloped heel section
- Three-sided zipper
- Slip-resistant bottom

Specifications

Model number	1805
Overall width	26" (66 cm), 30" (76 cm)
Overall length	76" (193 cm)
Thickness	5.5" (14 cm)
Weight capacity	700 lb. (317 kg)
Fire retardant inner cover*	Yes

*Flammability standards: CALTB117; 16CFR1632; CGSB CAN 2-4.2 Method 27.7-M77; BS EN 597-1; BS EN 597-2; CAL TB129; 16CFR1633; BS 6807, Clause 9; BFD IX-11; UNI9175
